

**Product Name** □ SKF-15 PLATE BEVEL MILLING MACHINE

**BRIEF OF PRODUCTS** □ This machine is a handy and flexible unit for the preparation of welding, beveling, deburring of materials, low weight (compared with our other similar machines) enables the use at almost every work place and a rattling-free, steady milling operation. The handling and operation is easy and safe. The machine is suitable for milling steel, VA, cast iron and nonferrous heavy metal by one-hand operation.

**Features** □

Smooth and flat beveling face, layer of oxide, facilitate for welding.

Meet the need of K、V、X and Y types of welding joint.

suitable for milling steel, VA, cast iron and nonferrous heavy metal by one-hand operation.

**TECHNICAL PARAMETER** □

Land width □ 15mm □ Adjustable □ □

Bevel angle □ 30°-60° □ Adjustable □ □

Weight □ 18KG。

**Motor:Siemens motor** □

Voltage □ 380V □ Frequency 50Hz □ Power 1.1KW

Rotation speed □ 2870rpm

Parts of the plate bevel process include: 1. Milling. 2. Grinding. 3. Polishing. 4. Heat treatment. 5. 60 or 55mm
